

Students Nominated for the Outstanding Engineering Student of the Year Award

Cleveland State University's Fenn College of Engineering nominated four individuals for the Outstanding Engineering Student of the Year Award, presented by the Cleveland Area National Engineers Week Committee. Nominees included: Heather Hlasko, civil engineering; Eric Mack, civil engineering; Ryan Nakhoul, computer engineering; and Hoby Randrianasolo, industrial engineering.

The students were selected based not only on academic achievements, but also for their involvement in college activities including student organizations, as well as for their volunteer efforts and work related accomplishments.

In his letter recommending these students, Dean Charles Alexander said, "I believe that each nominee possesses a spirit of teamwork, a sense of responsibility, and a professional demeanor that is critically important in today's business environment. I am confident that each student is well qualified for this honor."

Throughout his career at Cleveland State ***Eric Mack*** has been on the Dean's list almost every semester. He has received several scholarships including: the Ford Motor Scholarship, the Washington International Group Scholarship, and the Ohio Contractors Association Scholarship. He also received the William H. Compton Engineering Award last year.

Mack was the president of the student chapter of the American Society of Civil Engineers (ASCE) at Cleveland State, the vice-president of the Joint Engineering Council (JEC), and was the treasurer of Tau Beta Pi during his senior year.

Since graduation, Mack has been working for GRL Engineers, Inc. In the fall, he will be attending Cleveland State to obtain master's degrees in civil engineering and business administration.

Both Hlasko and Mack were appointed vice-presidents of the Fenn College Alumni Association.
