

GRL ENGINEERS ANNOUNCES OFFICE OPENING IN SEATTLE

GRL Engineers has announced the opening of a Branch Office in Seattle, Washington. “We are opening this office to better serve the needs of our growing client base in WA, OR, ID and Western Canada” said Pat Hannigan, President of GRL. Marty Bixler, one of GRL’s most senior and accomplished testing engineers, will manage the new location. Marty has been with the Florida Office of GRL for almost 20 years. As

all other GRL offices, the Washington office will provide PDA services on driven or drilled foundations, integrity testing by low strain, thermal profiling and CSL methods, wave equation analysis, SPT Hammer and Becker Drill calibration, and other specialty services and analyses. Marty may be contacted at mbixler@GRLengineers.com or 425-381-9690. For more information on GRL testing and analyses visit www.GRLengineers.com. ■
