

Thermal Integrity Profiling (TIP) Services with GRL Engineers

From initial project planning to providing data reports, GRL Engineers, Inc., provides Thermal Integrity Profiling (TIP) services from start to finish. GRL offers installation, monitoring, analysis and reporting of TIP data and results through our cloud based (ATLAS™) data transmission system. In addition, GRL is able to provide consultation if the TIP results indicate further evaluation is necessary.

GRL Engineer Advantages

- Proper installation of Thermal Wire® cables; no additional training required
- Real-time data access in ATLAS secure data management cloud
- End-to-end project management and coordination
- Transparent data analysis and reporting

Notable TIP Testing Projects

- Seattle Center Arena
- Tri-state Tollway Mile Long Bridge
- Charlotte Gateway Expansion
- Van Wyck Expressway
- I-77 Canton Mainline Bridge
- NASA's Vehicle Assembly Building, Kentucky Space Center
- Central 70 Highway, Colorado
- Interstate 440
